### DETAILED ACTION

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-7 and 18-20, drawn to a pyridine derivative, classified in class 546, subclass 249.
- II. Claims 8-12 and 18-20, drawn to an acid ester, classified in class 562, subclass 598.
- III. Claims 13-17 and 18-20, drawn to a furan derivative, classified in class 549, subclass 479.

The inventions are distinct, each from the other because:

The above delineated groups are drawn to compounds having distinct chemical structures. They lack a common core structure which is essential to the utilities of the compound(s). The compounds are made by processes having different reaction conditions, and one is distinct from the other. A reference of one group would not suggest and/or render the other obvious in the absence of the secondary teachings. A search of one group is not required for the search of the other group.

Thus, the restriction requirement as indicated is deemed proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the

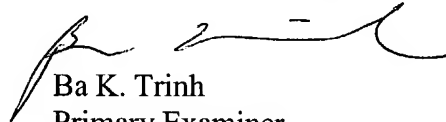

Art Unit: 1625

currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
